Social protection can improve adolescent girls' lives today and transform their futures.

This event is a chance to hear from leading voices in social protection how programmes can better **address life course vulnerabilities and break inter-generational cycles of poverty**. It will demonstrate the need for **adolescent- and gender-responsive policy, programmes and research to build effective social protection systems**.

Over the last decade, the understanding of **adolescence as a critical window of opportunity** to accelerate development has increased, yet social protection systems still do not systematically target the needs of adolescents, especially the promotion of gender equality. A new approach will ensure no girl or woman is left behind.
