March 2024

Preamble

The GAGE Ethiopia Round 3 quantitative survey collected data from adolescents (“core respondents”) across three GAGE study locations (Debre Tabor, South Gondar, and East Hararghe) between early 2021 and mid-2022. Data collection was divided prospectively into two waves in anticipation of a pause around the 2021 Ethiopian general election. Tailored versions of the survey were created for the pre- and post-election enumeration waves, and across different subsamples of interest within the post-election wave (including a new cohort of Very Young Adolescents (VYA) recruited in East Hararghe and South Gondar). In total, there were five versions of the Round 3 Core Respondent Module combining questions asked of all adolescents with questions on topics of interest specific to each subsample.

Wave 1 of Round 3 was conducted between March and May 2021 (before the election) in GAGE research sites in Debre Tabor, East Hararghe, and South Gondar. During this wave, the survey enumeration team attempted to administer the survey to (i) all GAGE adolescents from the Debre Tabor cohort (including adolescents who had participated in previous rounds of GAGE quantitative research as well as those who were newly recruited to GAGE at the start of Round 3 data collection), and (ii) a random subset of adolescents from the East Hararghe and South Gondar cohorts who had participated in previous rounds of GAGE quantitative research. With regard to the latter, a stratified random sample was selected from each zone, composed of a 25% sample of those living in households with a recorded phone number and a 35% sample of those living in households with no known phone number. A single survey instrument was used for this wave, the GAGE Ethiopia Round 3 Survey (Wave 1, 2021), **Core Respondent Module (a)**.

Once the 2021 elections had concluded, Wave 2 of the GAGE Round 3 quantitative data collection was launched and spanned October 2021 to May 2022. Different subsamples of adolescents were interviewed in this survey wave, with tailored survey modules designed for each subsample as follows:

- **Core Respondent Module (b), Debre Tabor:** A random sample of 50% of adolescents tracked during the Round 3, Wave 1 data collection in Debre Tabor (stratified by gender and age) were sought to be re-interviewed in Wave 2. The survey module used for this sample is entitled the GAGE Ethiopia Round 3 Survey (Wave 2 – Debre Tabor, 2022).
- **Core Respondent Module (c), East Hararghe:** The remaining 75% of adolescents living in households with a recorded phone number and the remaining 65% of adolescents living in households without a known phone number – none of whom were sought during Wave 1 – were sought to be interviewed in East Hararghe in Wave 2. The survey module used for this sample is entitled the GAGE Ethiopia Round 3 Survey (Wave 2 – East Hararghe, 2021/22).
- **Core Respondent Module (d), South Gondar:** The remaining 75% of adolescents living in households with a recorded phone number and the remaining 65% of adolescents living in households without a known phone number – none of whom were sought during Wave 1 – were sought to be interviewed in South Gondar in Wave 2. The survey module used for this sample is entitled the GAGE Ethiopia Round 3 Survey (Wave 2 – South Gondar, 2022).
- **Core Respondent Module (e), newly recruited sample of VYA in East Hararghe and South Gondar:** GAGE recruited a new sample of VYA (aged 11-13 at the time of data collection) during late 2021 and early 2022 in East Hararghe and South Gondar. As these adolescents were younger than those in the existing GAGE sample, a separate survey was created to capture information about them and their households. The survey module used for this sample is entitled the GAGE Ethiopia Round 3 Survey (Wave 2 – New VYA, 2021/22).
